

## TONY MARCEDDO

General Manager

*Tony Marceddo is the General Manager of Vault. In his role, he is responsible for leading the development and implementation of Vault's' operational strategy and ensuring the smooth running of the governance of the company.*

Tony has demonstrated his skills as a trusted business manager, and program director through over 20-years leadership experience spanning numerous industries including the Defence, Intelligence, Space, Cyber and Communication sectors.

In his previous role, Tony served as General Manager of Australian Intelligence and Cyber Security at Northrop Grumman. He was responsible for the incorporation of M5 Network Security into Northrop Grumman operations. The integration included the delivery of key projects to the Defence industry, such as next-generation secure mobile ICT, secure communications for the Australian Army, and computer network defence. In his three years as General Manager, directly overseeing more than 120 staff, the business achieved around 20% growth year on year.

Prior to Northrop Grumman, Tony worked for Raytheon for eight years in a range of management and project roles, which included Deputy General Manager for the Intelligence and Cyber business. This included the integration of COMPUCAT into Raytheon operations and managing the Intelligence and Security programs. Tony further demonstrated his management skills in this position, overseeing more than 300 direct staff when managing the JDFPG contract for Raytheon at Alice Springs. Tony also possesses extensive experience working in the Australian Federal Government and Intelligence sector as a director and senior manager across multiple projects for the Australian Signals Directorate.

Tony's achievements in the Defence and Intelligence sectors have been recognised by the Australian and United States Intelligence communities. Tony has been awarded a United States Intelligence Medallion and an Australian Intelligence Community Medallion.

Tony earned a Graduate Certificate in Management from Flinders University South Australia, an Advanced Diploma in Project Management, a Diploma of Applied Science in Microwave Communications from Navy, ACT Accreditation, and is a Member of the Australian Institute of Project Managers.
